BETTOCLEAN BLUE

Concrete, Mortar, Lime, Algae, Moss, Fungus, Bacteria and Rust Cleaner

MATERIAL DESCRIPTION

BETTOCLEAN BLUE is a highly effective cleaning material containing inorganic acids, ozone, solvents, heavy toxic metals and chromates.

AREAS OF USE

- Indoor and outdoor, horizontal and vertical applications,
- For the cleaning of lime vomiting on brick surfaces,
- Cleaning of lime, fungus and algae in swimming pools,
- Pore opener and cleaning of all kinds of concrete and mortar surfaces,
- Cleaning of dirty joint fillers (Cement and Epoxy) between ceramic, tile, marble, granite,
- Effective cleaning of dirt on surfaces such as natural stone, travertine, cotto and brick,
- Effective cleaning of bacteria, fungi and algae deposits on many surfaces,
- It is used as a rust solvent on a number of surfaces.

ADVANTAGES

- Penetrates deeply into the pores of concrete and mortar surfaces,
- Can be used in 1:1 dilution,
- It provides economical and very fast results,
- Easy to implement and use,
- The control color is dark blue, pine-scented,
- Perfectly cleans joints with dirt and bacteria without irritation,
- It is very fast and effective.

TECHNICAL SPECIFICATIONS

Structure of the Material	Acidic Detergent
Color	Blue
Specific Gravity	1.0 gr/cm ³
Application Temperature	+5°C +30°C
Odor	Pine Scented

Note: The above values are given for +23°C and 50% relative humidity. High temperatures shorten the time, low temperatures lengthen the time.

APPLICATION METHOD

Although **BETTOCLEAN BLUE** is a ready-to-use material, it is recommended to mix it with water at a ratio of 1:1 on very sensitive surfaces, even on lightly soiled surfaces, due to the risk of color fading. In extremely and heavily soiled areas, the application can be repeated several times. After **BETTOCLEAN BLUE** is sprayed or dipped on the surface, wait for 5 minutes and apply by rubbing with a stiff bristle brush. The surfaces should be rinsed with water without allowing it to dry.

SURFACE PREPARATION

It is sufficient to ensure that the surface is dry, but care should be taken on soft and sensitive surfaces.

PACKAGING

5 and 25 kg plastic drums.

EXPENDITURE

100 ^{gr/m²} depending on the porosity and contamination of the existing around. On heavily soiled surfaces, a 2nd coat application is required.

STORAGE

It should be stored in its unopened original packaging, in cool and dry places, protected from frost.

SHELF LIFE

Under appropriate storage conditions, 2 years from the date of manufacture.

SECURITY MEASURES

BETTOCLEAN BLUE should never be poured into metal containers. Avoid getting it on hands, eyes and face. In case of contamination, wash with plenty of water. Wear gloves, mask and protective goggles during application. When applying indoors, windows should be opened if available, otherwise proper ventilation should be provided. **BETTOCLEAN BLUE** should not be mixed with any other cleaners and/or chemicals. It should only be mixed with water. It should be kept out of the reach of children in waist-high places.
